

PEST-STOP

Serious about pest control

electronic rat killer

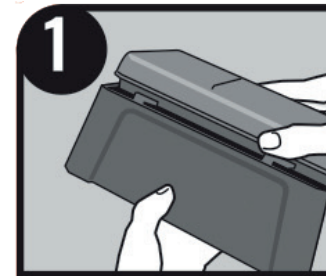

- ✓ Kills rats through electric shock
- ✓ Easy to dispose of dead rats
- ✓ Quick humane kill
- ✓ New & improved design

DIRECTIONS

1. Switch OFF ("0") and remove batteries.
2. Open bait door. Use pea-sized amount of peanut butter in bait cup only. Bait touching metal may cause malfunction.
3. Place the trap on a clean, dry surface along a wall.
4. Insert 4 "C" batteries. Turn the switch to the ON ("1") position. The green light will flash and the unit will buzz to indicate the unit has been enabled.
5. Rodent Caught: Green light (flashes one week).
6. Low Battery: Red light.
7. Rodent Disposal: Turn the switch to OFF ("0") and remove batteries. Open the kill chamber door and properly discard rodent. Follow cleaning instructions.

CLEANING INSTRUCTIONS

Trap Cleaning Instructions
Cleaning is only needed when debris is on the metal plates. It is not necessary to clean the trap after every use.

1. Separate Units: Switch OFF ("0") and remove batteries. Slide top backwards and pull away from chamber.
2. Clean Chamber: Use warm water, soft bristle brush, and hydrogen peroxide topical solution only. Do NOT get water on electronic top.
3. Dry Chamber: Allow interior and exterior to air dry completely.
4. Dry Hands Thoroughly.
5. Reassemble: Hold trap as shown in step 1 and slide to forward into place.
6. Reload: Repeat trap use instruction steps 1-4.
