### SECTION 4: First aid measures

#### 4.1. Description of first aid measures

First-aid measures general	: In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible). Advice for Medical Doctors: Brodifacoum is an indirect anti-coagulant. Phytomenadione, Vitamin K, is antidotal. Determine prothrombin time not less than 18 hours after consumption. If elevated, administer Vitamin K1 until prothrombin time normalises. Continue determination of prothrombin time for two weeks after withdrawal of antidote and resume treatment if elevation occurs in that time.
First-aid measures after inhalation	: Inhalation not likely.
First-aid measures after skin contact	: Seek medical attention if irritation develops. Take off immediately all contaminated clothing and wash it before reuse. After contact with skin, wash immediately and thoroughly with water and soap.
First-aid measures after eye contact	: If eye irritation persists: Get medical advice/attention. Rinse immediately and plentifully with water and take medical advice.
First-aid measures after ingestion	: Rinse mouth thoroughly with water. Do not induce vomiting. Get immediate medical advice/attention.

#### 4.2. Most important symptoms and effects, both acute and delayed

Symptoms/effects	: The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Symptoms/effects after inhalation	: None under normal use.
Symptoms/effects after skin contact	: May cause skin irritation.
Symptoms/effects after eye contact	: May cause slight irritation.

#### 4.3. Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

### SECTION 5: Firefighting measures

#### 5.1. Extinguishing media
