

Instructions for use

Spray in and around the house, in areas occupied by insects. Apply by directly targeting the insect or in places and corners where insects are present: cracks, skirting boards, door bottoms, under sinks, dustbins, patios, bed bases, mattresses (protect the mattress with a mattress protector or cover to avoid any contact with the product).

Spray the product directly on the pests for optimal effect. As an indication, insects the size of a cockroach require two lever presses with the trigger. The product is effective within minutes: the insect will gradually become immobile. The duration of action varies according to insect size and shape. In cases of new infestations, treat again.

Precautions

Do not spray on surfaces intended to come into contact with food. Do not spray on people, plants or animals. Wash hands after use. Do not discharge into drains or watercourses. Ventilate the room during treatment and 30 minutes to 2 hours after treatment. Dispose of the product and packaging in accordance with local regulations. Do not use this product for any purpose other than its intended use.

This product is not classified as hazardous according to Regulation (EC) No 1272/2008. It is readily biodegradable according to OECD 301A. Does not stain, but beware of electronic equipment and sensitive surfaces (e.g. wooden floors). As a precaution, test in a hard-to-see corner before treatment.
